

Resizing plots

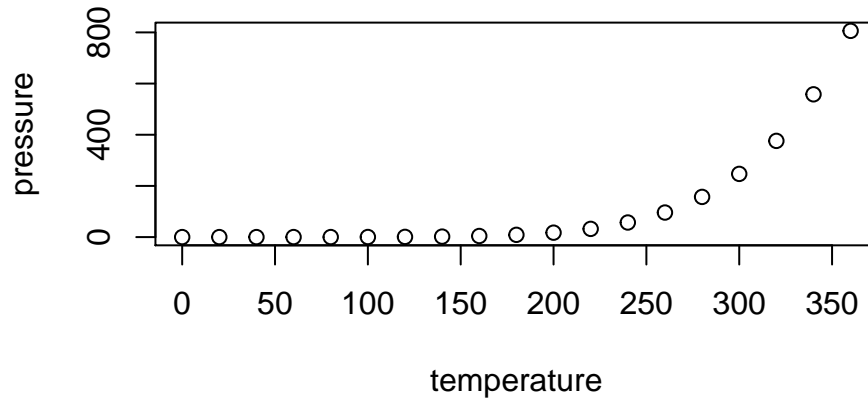

Mick McQuaid

This file is based on the blog post at https://sebastiansauer.github.io/figure_sizing_knitr/

```
knitr::opts_chunk$set(fig.width=12,fig.height=8)
```

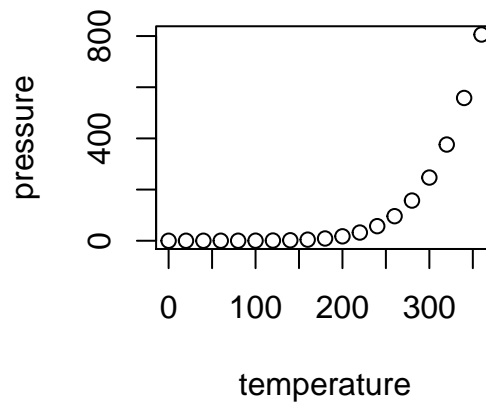

The first plot follows.

```
plot(pressure)
```

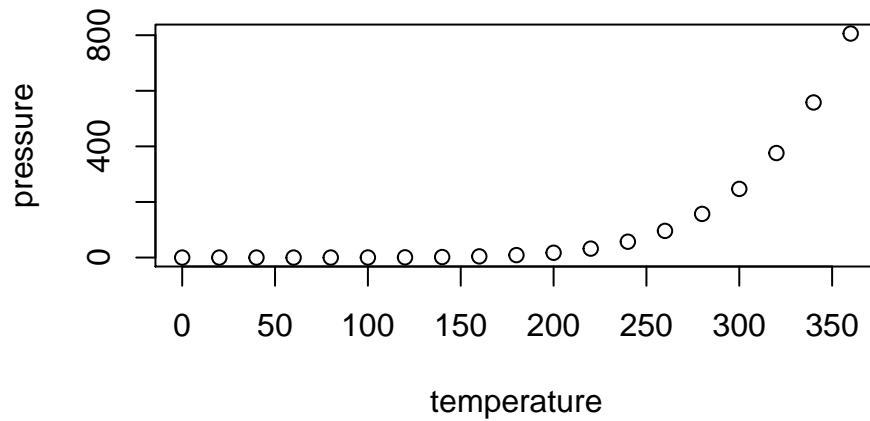

The second plot follows.

```
plot(pressure)
```

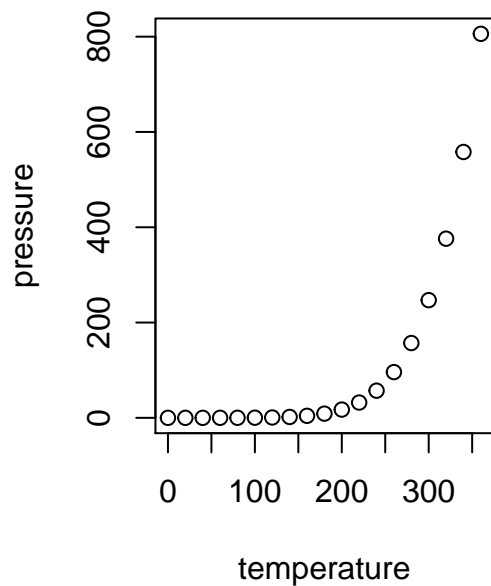

The third plot follows.

```
plot(pressure)
```

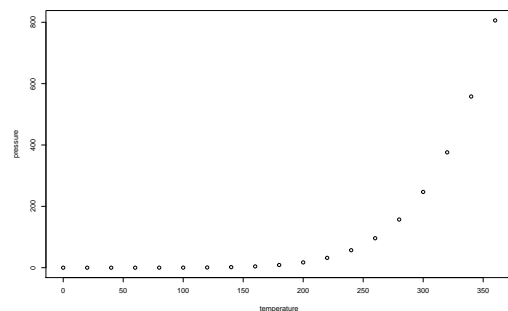

The fourth plot follows.

```
plot(pressure)
```

The fifth plot follows. Note that the specification in percentage is allowed if you render straight to pdf but may not work if you render first to html.

```
plot(pressure)
```

Change figure sizes like this:

```
! [name] (file.jpg){width=50%}
```
